

Client Implementations

Seamlessly integrating and deploying new platforms and AI solutions within your existing systems.

Implementing tailored systems that align with each client's unique business operations.

CLIENT IMPLEMENTATIONS ALSO KNOWN AS CLIENT ONBOARDING

Our implementation team takes each new client from signed agreement to live system: gathering their requirements, configuring the target software to meet them, setting up live and testing environments with the right logins, access and permissions, and importing their data.

Throughout, we work closely with the client to validate settings and environments, and capture the change or feature requests that could better support their business functions.

WHAT CLIENTS GET

- **A system configured to your business**, not a one-size-fits-all setup
- **Tested, validated environments** before anyone goes live, with the right access from day one
- **Your data brought across**, from employees and business units to historical data and shifts

UNITED STATES

Address

Beachwalk,
St Johns, Florida, 32259

OUR CLIENTS

HOW WE ONBOARD CLIENTS

01 Gather Requirements

- Understand how the client’s business runs
- Capture and confirm client requirements

02 Configure the System

- Configure the target software to meet requirements
- Tailor settings to each client’s business functions

03 Environments & Access

- Set up live and testing environments
- Logins, access and permissions

04 Import Client Data

- Employees and business units
- Historical data, shifts and more

05 Change & Feature Requests

- Gather change or feature requests
- Better support the client’s business functions

06 Validate & Go Live

- Validate settings and test thoroughly
- Work closely with clients to validate environments
